Wetenschappelijke artikelen voor ESA "remote sensing" "water resources"

Quantitative use of passive optical remote sensing over ... - Van Stokkom - Geciteerd door 11
Application of remote sensing methods to hydrology and ... - Rango - Geciteerd door 10
Parameterization of Hydrological Models: The ... - Hochschild - Geciteerd door 4

ESA - Observing the Earth - Understanding Our Planet - Space ...

14 Nov 2007 ... Space technology put into service for global water resources observations ... In this situation, remote-sensing techniques have demonstrated ...
• Users’ needs are steered by (commercial) suppliers

• The role of RS in water resources is much more relevant abroad than in the Netherlands

• The success of future RS applications are in the linkage with prediction tools

• Application of data from ESA satellites is hampered by its strict data policy
